THE EVOLUTION OF PERFECTION! DISCOVER THE RSC RANGE!

The RSC range has been designed to satisfy all professionals' requirements and ensure reliability as well as high operation performance. The innovative design, inspired by the racing world, provides these mobile roller cabs and trolleys with a captivating, unique style: the 7 colours and its finish make the RSC range synonymous with one-of-a-kind products in the market. The sturdy frameworks and the materials result in high quality and remarkable durability, thereby effectively supporting the daily work of industrial production departments, mechanics, car body repairers and general maintenance service providers. What is more, most RSC roller cabs are TÜV certified. This prestigious certification - which is the name for safety and guaranteed quality - is obtained upon successful completion of severe tests under the EK5/TA5 protocol.

A STYLISH, SLIM SHAPE ENHANCED BY A SLENDER PROFILE, LIGHTER TO THE TOUCH.

42

The strength, resilience and ergonomic design of the Beta wrench reach even higher values, to provide users with the best possible tool. The manufacturing process is carried out in our factories in Sovico and Sulmona, on the basis of state-of-the-art automation technology and the best trained workers.

ERGONOMIC

The offset ring has a 15 degree angle to protect the hand. The shape is obtained from a die; it is not bent later.

POWERFUL

Torque values more than doubled compared to the requirements to be satisfied under ISO 1711.

STRENGTH

Remarkable strength: in case of improper use, the wrench buckles, without breaking suddenly and dangerously.

THE TORQUE WRENCH THAT DOES NOT REQUIRE RELEASING TENSION

NEW!

Even if tension is not released, the number of cycles, durability and tightening accuracy as required by reference standards are guaranteed.

In order to confirm these parameters, Beta Utensili's Research & Development Department performed numerous durability tests at the in-house laboratories as at hundreds of end users.

This result has been obtained through:

- the use of the best-performing currently available materials;
- special heat treatments on interior parts.

ZERO-RESET

100% MADE IN ITALY

The Zero-Reset torque wrench was entirely designed and developed in-house and is manufactured at Beta Utensili's factories in Italy, using 100% Italian-made parts.

ZERO-RESET TECHNOLOGY: Based on higher-performance materials and improved heat treatment of both the spring and the component parts of the adjustment system, the wrench no longer requires releasing tension after use.

EASY SETTINGS: The graduated scale allows minimum interval fractions to be set up (in tenths of Nm/lbf.ft).

IMPROVED VISIBILITY: Double graduation for clearer, simpler torque visibility.

BETA'S PULLER 1517C

Relies on a leg self-locking mechanism triggered by the spring on the crosspiece. This feature makes it easy to position and lock the puller on the part to remove. After the puller has been fixed in place, the legs can be locked by means of the ring nut. The peculiar crosspiece has 4 seats which allow the 1517C puller to be used with both 2 legs – for easier, quicker jobs – and 3 legs – for increased firmness. The shear pin on the screw head breaks when the maximum permissible torque is exceeded, thereby protecting the puller from overloads.

Combination two/three-leg self-locking pullers

- Leg holder with configuration for 2- or 3-leg use
- Simultaneous leg opening
- Self-locking effect
- With shear pin

Since 2022 the established, authoritative welding specialist, Helvi, and Beta Utensili have been working together to develop ground-breaking technologies. This joint effort has translated into the new range of Beta by Helvi welding machines, which boast ultimate performance in line with its high quality standards.

Easy-to-use inverter welding machines with excellent welding characteristics for all types of electrodes. With overvoltage and overtemperature control and electrode anti-sticking function. Compact and lightweight, ideal for home maintenance jobs, light carpentry and maintenance jobs.

THE RANGE OF REELS

Beta's wide, complete range of reels has been designed and developed to satisfy all professionals' requirements. High-resistance spring ensuring remarkable durability and fluidity in use. Shells made of thick polypropylene, for unique shock resistance. Rack device causing automatic cable rewind to stop, easy to disable, to allow continuous traction. Each reel is fitted with a 180° swivel wall-mount bracket and an additional bracket for quick connection and disconnection from the wall-mount support.

- Length of cable out of shell: 1 m
- Rack mechanism can be disabled to keep cable in traction
- Coiled cable length: 15 m

THE RANGE OF BETA-BRANDED ANGLE GRINDERS

Power, Reliability and Durability are the three hallmarks of the new range, with the focus also being on maximum safety and ease of use for professionals.

- **Outstanding performance:**
 - Powerful, resin-bonded, wear-resistant, durable motor
 - Air vents providing optimal cooling, protected against dust infiltration
- **Unparalleled safety for operators:**
 - Spindle lock device for quick disc changes
 - Protection against accidental activation
 - Smooth start, for limiting large initial inrush of current on start-up
- **Unique comfort and ease of handling:**
 - Nonslip ergonomic handle for improved grip
 - Lowered head that allows working in confined spaces
 - Tangle-free cable no less than 4 metres in length for increased ease of movement
 - Additional handle that can be mounted on both sides

Available for discs 115/125/230 mm in diameter, rated absorbed power ranging from 750 W to 2400 W.

Eco friendly, heated manual cleaning tank

- Using the bio-active liquid included, oil and residue can be effectively removed from mechanical parts without the need for aggressive chemicals
- The bio-active liquid converts the oil and other residue into carbon dioxide and water which can be re-used again and again
- No need for specialist waste collection and disposal
- Suitable for both metal and plastic parts

EQUIPMENT:

- Long bristle brush and connecting pipe
- Right-hand and left-hand operation function
- Perforated stainless steel grid
- Wheels with brakes
- Card with display operating temperature and low level alert

Ultrasonic cleaning tank with special degas function

- Ultrasonic cleaning relies on fluid heating to effectively clean spare parts and metal pieces in general (carburetors, valves etc.)
- Digital display for temperature and cleaning time selection
- Two cleaning modes: "soft" and "normal"
- For normal cleaning, just use water at a temperature of 50/60 °C
- For more accurate cleaning, add non-foaming detergent solutions specific for ultrasonic tanks
- Using the degas mode speeds up air release throughout the tank, thereby improving ultrasonic cleaning efficiency

Set of dummy regulators for testing diesel common rail system (for use with Beta 1464T-1464AP)

Used with the tester and suitable adapters, it makes it possible to determine whether the problem is the high pressure pump or the regulator when there is no pressure in the high pressure circuit in common rail engines.

Recommended for Bosch, Delphi, Denso and Siemens pressure regulators

ROBUR's permanent magnetic lifters stand out as compact, sturdy, reliable machines; they are widely used in factories, warehouses, harbour quays and transportation facilities. Designed in compliance with EN13155, this equipment is suitable for lifting and handling magnetic iron materials, including dies, sheet metal, pipes, fittings, beams and bars.

The permanent magnet is made from a Neodymium-Iron-Boron alloy, which has an extremely high attractive force and is defined as "super magnetic".

Since magnetic lifters require no voltage, they can also be used in places where no power connection is available. One operator can easily lift, transport and release the load through the operating lever: when the lever is moved into the ON position, a spring mechanism will lock it, keeping the magnet active and preventing accidental release.
