Gli utensili anticoppia in rame beryllio di Beta Utensili S.p.A. non devono essere usati a contatto  
 e in presenza di scintille o con apparecchiature che funzionano con accensione.  
 L'utensile può reagire con il rame dello strumento per formare un scintillio esplosivo.  
 Beta sparkproof tools cannot be used in contact with acetylene or with devices that function  
 by ignition.  
 Acetylene can react with the copper of the tool and form copper acetylide, a powerful  
 and very dangerous explosive.
