## Industrial alkaline detergent for ultrasonic tank

Industrial alkaline detergent, concentrated, water-based.  
 For ultrasonic cleaning and other purification processes.  
 Allows spare parts and metal pieces in general (injectors, carburetors, valves etc.) to be accurately and effectively cleaned.  
 Removes oil, grease, lubricants, residues of glue, resin and wax. Also suitable for cleaning aluminium parts.

pH 13.5  
 Recommended amount:  
 3-4% (1:30) - light to normal dirt  
 5% (1:20) - heavy dirt  
 Operating temperature: > 40 °C - for aluminium: max. recommended temperature 65 °C.  
 After treatment, rinse with water.
